

JOURNAL OF CLINICAL MICROBIOLOGY

Volume 19

February 1984

No. 2

BACTERIOLOGY

- Comparison of *Legionella pneumophila*, *L. micdadei*, *L. bozemanii*, and *L. dumofii* by Transmission Electron Microscopy.** G. Ann Hébert, Carey S. Callaway, and Edwin P. Ewing, Jr. 116-121
- Enterotoxin Production in Relation to Taxonomic Grouping and Source of Isolation of *Aeromonas* Species.** Peter C. B. Turnbull, John V. Lee, Marianne D. Miliotis, Senta Van De Walle, Hendrik J. Koornhof, Lynn Jeffery, and Trevor N. Bryant 175-180
- Quantitation of Bacteria in Cerebrospinal Fluid and Blood of Children with Meningitis and Its Diagnostic Significance.** Leonard J. La Scolea, Jr. and Diane Dryja 187-190
- Escherichia coli* K5 Antigen in Relation to Various Infections and in Healthy Individuals.** B. Kaijser and U. Jodal 264-266
- Characterization of *Pseudomonas cepacia* Isolates from Patients with Cystic Fibrosis.** Aileen I. McKevitt and Donald E. Woods 291-293

VIROLOGY, RICKETTSIOLOGY, AND CHLAMYDIOLOGY

- Isolation and Serotyping of Porcine Rotaviruses and Antigenic Comparison with Other Rotaviruses.** Edward H. Bohl, Kenneth W. Theil, and Linda J. Saif 105-111
- Immunity to Human Cytomegalovirus Measured and Compared by Complement Fixation, Indirect Fluorescent-Antibody, Indirect Hemagglutination, and Enzyme-Linked Immunosorbent Assays.** James A. Brandt, James D. Kettering, and John E. Lewis 147-152
- Cultivation and Subgroup Determination of Human Rotaviruses from Egyptian Infants and Young Children.** Tary Naguib, Richard G. Wyatt, Mohamed S. Mohieldin, Ahmed M. Zaki, Imam Z. Imam, and Herbert L. DuPont 210-212
- Detection of Human Immunoglobulins G and M Antibodies to Rift Valley Fever Virus by Enzyme-Linked Immunosorbent Assay.** B. Niklasson, C. J. Peters, M. Grandien, and O. Wood 225-229
- Herpes Simplex Virus Type-Selective Enzyme-Linked Immunosorbent Assay with *Helix pomatia* Lectin-Purified Antigens.** B. Svennerholm, S. Olofsson, S. Jeansson, A. Vahlne, and E. Lycke 235-239
- Enzyme-Linked Immunosorbent Assays Based on Polyclonal and Monoclonal Antibodies for Rotavirus Detection.** G. M. Beards, A. D. Campbell, N. R. Cottrell, J. S. M. Peiris, N. Rees, R. C. Sanders, J. A. Shirley, H. C. Wood, and T. H. Flewett 248-254
- Efficient Coating of the Solid Phase with Rotavirus Antigens for Enzyme-Linked Immunosorbent Assay of Immunoglobulin A Antibody in Feces.** Sakae Inouye, Shigeo Matsuno, and Hideaki Yamaguchi 259-263
- Enzyme Immunoassay for Rabies Antibody in Hybridoma Culture Fluids and Its Application to Differentiation of Street and Laboratory Strains of Rabies Virus.** J. S. Smith, J. W. Sumner, and L. F. Roumillat 267-272
- Rapid Serotyping of Human Rotavirus Strains by Solid-Phase Immune Electron Microscopy.** Giuseppe Gerna, Nilda Passarani, Massimo Battaglia, and Elena Percivalle 273-278
- Naturally Acquired Rabies in an Eastern Chipmunk (*Tamias striatus*).** Harold Dowda and Arthur F. DiSalvo 281-282

Continued on following page

MYCOPLASMATOLOGY

- Immunoglobulin A Protease Activity of *Ureaplasma urealyticum*.** Janet A. Robertson, Margaret E. Stemler, and Gerald W. Stemke..... 255–258

PARASITOLOGY

- Microvolume, Kinetic-Dependent Enzyme-Linked Immunosorbent Assay for Amoeba Antibodies.** Henry M. Mathews, Kenneth W. Walls, and Alan Y. Huong..... 221–224

EPIDEMIOLOGY

- Comparison of Plasmid Profile Analysis, Phage Typing, and Antimicrobial Susceptibility Testing in Characterizing *Salmonella typhimurium* Isolates from Outbreaks.** Scott D. Holmberg, I. Kaye Wachsmuth, Frances W. Hickman-Brenner, and Mitchell L. Cohen..... 100–104
- Epidemiological Aspects of Enteritis Due to *Campylobacter* spp. in Norway.** Jørgen Lassen and Georg Kapperud 153–156
- Serotyping and Biotyping of *Campylobacter jejuni* and *Campylobacter coli* from Sporadic Cases and Outbreaks in Norway.** G. Kapperud, J. Lassen, S. Lauwers, and O. Rosef..... 157–160
- Large-Scale Serological Screening for Cytomegalovirus Antibodies in Homosexual Males by Enzyme-Linked Immunosorbent Assay.** Joe S. Dylewski, Lucy Rasmussen, John Mills, and Thomas C. Merigan..... 200–203

HOSPITAL EPIDEMIOLOGY

- Nosocomial Colonization and Infection by *Achromobacter xylosoxidans*.** Marie E. Reverdy, Jean Freney, Jean Fleurette, Michèle Coulet, Maryse Surgot, Danièle Marmet, and Christine Ploton 140–143

IMMUNOLOGY

- Evaluation of Various Plastic Microtiter Plates with Measles, Toxoplasma, and Gamma Globulin Antigens in Enzyme-Linked Immunosorbent Assays.** I. C. Shekarchi, J. L. Sever, Y. J. Lee, G. Castellano, and D. L. Madden..... 89–96
- Rapid Detection of *Clostridium perfringens* Type A Enterotoxin by Enzyme-Linked Immunosorbent Assay.** Bruce A. McClane and Robert J. Strouse 112–115
- Analysis of *Campylobacter jejuni* Antigens with Monoclonal Antibodies.** Timo U. Kosunen, Barbro E. Bång, and Mikko Hurme 129–133
- Production of *Vibrio cholerae* O1 and Non-O1 Typing Sera in Rabbits Immunized with Polysaccharide-Protein Carrier Conjugates.** Linda B. Adams and Ronald J. Siebeling 181–186
- Enzyme-Linked Immunosorbent Assay with a Monoclonal Antibody for Detecting Group A Meningococcal Antigens in Cerebrospinal Fluid.** Renee J. Sugasawara, Catherine M. Prato, and John E. Sippel..... 230–234

GENERAL CLINICAL MICROBIOLOGY

- Comparative Studies and Laboratory Diagnosis of *Vibrio vulnificus*, an Invasive *Vibrio* sp.** Edward P. Desmond, J. Michael Janda, Frederick Adams, and Edward J. Bottone..... 122–125
- Clinical Evaluation of the Lysis-Centrifugation Blood Culture System for the Detection of Fungemia and Comparison with a Conventional Biphasic Broth Blood Culture System.** Jacques Bille, Randall S. Edson, and Glenn D. Roberts..... 126–128

Interpretive Standards and Quality Control Limits for Susceptibility Tests with Ampicillin-Sulbactam Combination Disks. Arthur L. Barry, Ronald N. Jones, and Clyde Thornsberry	134-139
Analysis of Bacterial Isolates from Cerebrospinal Fluid. David A. Olson and Paul D. Hoepflich	144-146
Effects of Overnight Refrigeration on the Microscopic Evaluation of Sputum. Robert L. Penn and Ronald Silberman	161-163
Blood-Free Selective Medium for Isolation of <i>Campylobacter jejuni</i> from Feces. F. J. Bolton, D. N. Hutchinson, and D. Coates	169-171
Wound Infections Caused by <i>Vibrio vulnificus</i>, a Marine Vibrio, in Inland Areas of the United States. Carol O. Tacket, Timothy J. Barrett, Jonathan M. Mann, Mark A. Roberts, and Paul A. Blake	197-199
Isolation of <i>Corynebacterium</i> Group JK from Clinical Specimens with a Semiselective Medium. Sigrid Wichmann, Carl H. Wirsing von Koenig, Elizabeth Becker-Boost, and Horst Finger	204-206
Effectiveness of the Antimicrobial Removal Device, BACTEC 16B Medium, and Thiol Broth in Neutralizing Antibacterial Activities of Imipenem, Norfloxacin, and Related Agents. Ellen Weinberg, Daniel L. Shungu, and Hans H. Gadebusch	207-209
Isolation of <i>Neisseria gonorrhoeae</i> on Selective and Nonselective Media in a Sexually Transmitted Disease Clinic. Paul Bonin, Teruyo T. Tanino, and H. Hunter Handsfield	218-220
Effect of Storage of the Du Pont Lysis-Centrifugation System on Recovery of Bacteria and Fungi in a Prospective Clinical Trial. Leslie Stockman, Glenn D. Roberts, and Duane M. Ilstrup	283-285
Isolation of Nontoxigenic <i>Vibrio cholerae</i> O Group 1 from a Patient with Severe Gastrointestinal Disease. J. Glenn Morris, Jr., James L. Picardi, Spencer Lieb, John V. Lee, Ann Roberts, Mary Hood, Robert A. Gunn, and Paul A. Blake	296-297

AUTOMATION AND ANALYTICAL CLINICAL MICROBIOLOGY

Comparative Evaluation of the API 20S System and the Automicrobic System Gram-Positive Identification Card for Species Identification of Streptococci. Peter C. Appelbaum, Michael R. Jacobs, James I. Heald, William M. Palko, Anneliese Duffett, Rosemary Crist, and Patricia A. Naugle	164-168
Rapid Detection of Bacteriuria by Laser Nephelometry. H. Richet, P. Bayardelle, and J. C. Lemarie	240-244

TECHNOLOGICAL DEVELOPMENTS

Contamination of Cultures Processed with the Isolator Lysis-Centrifugation Blood Culture Tube. Richard B. Thomson, Jr., Shirley J. Vanzo, Nancy K. Henry, Kristine L. Guenther, and John A. Washington II	97-99
Methylumbelliferyl-β-D-Glucuronide-Based Medium for Rapid Isolation and Identification of <i>Escherichia coli</i>. Richard W. Trepeta and Stephen C. Edberg ..	172-174
Comparison of Two Commercially Available Test Methods with Conventional Coagulase Tests for Identification of <i>Staphylococcus aureus</i>. Donald L. Jungkind, Nancy J. Torhan, Katherine E. Corman, and James M. Bondi ..	191-193
Evaluation of Three Simple and Rapid Immunological Tests for Detection of Heat-Labile Enterotoxin of Enterotoxigenic <i>Escherichia coli</i>. Dipak Sen, Malay R. Saha, and Sudhir C. Pal	194-196

Development and Evaluation of a Coculture Technique for Identification of Anaerobic Organisms. Zafar Hussain, Heinz Bürger, Robert Lannigan, and David J. Groves	215-217
Rapid Identification of Antibiotic-Resistant Corynebacteria with the API 20S System. Mary C. Kelly, Ian D. Smith, Rosemary J. Anstey, James H. Thornley, and Robert P. Rennie.....	245-247
Five-Hour Novobiocin Test for Differentiation of Coagulase-Negative Staphylococci. Brian J. Harrington and J. Michael Gaydos.....	279-280
Whole-Cell Peroxidase Test for Identification of <i>Legionella pneumophila</i>. Leo Pine, Paul S. Hoffman, Georgia B. Malcolm, Robert F. Benson, and George W. Gorman	286-290
Detection of <i>Clostridium difficile</i> Toxin with McCoy Cell Monolayers and Cell Suspensions and Comparison with HeLa Cell Assay. Atish C. Maniar, Hilary Chubb, Thomas J. Louie, Trevor W. Williams, William Forsyth, and John C. Wilt	294-295
Improved Preservation Medium for <i>Campylobacter jejuni</i>. G. Balakrish Nair, S. Chowdhury, P. Das, S. Pal, and S. C. Pal.....	298-299
Evaluation of the Dynatech MR 580 Microplate Reader for Routine Antimicrobial Susceptibility Testing. Mary F. Mazens and Raymond C. Bartlett	300
Use of the Autobac IDX System for Rapid Identification of <i>Enterobacteriaceae</i> and Nonfermentative Gram-Negative Bacilli. William J. Costigan and Gary E. Hollick	301-302

CLINICAL VETERINARY MICROBIOLOGY

Evaluation of the API 20 Strep System for Species Identification of Streptococci Isolated from Bovine Mastitis. Bernard Poutrel and Helena Z. Ryniewicz .	213-214
--	---------

ERRATA

<i>Candida ciferrii</i> and <i>Candida chiropterorum</i> Isolated from Clinical Specimens. Rita M. Furman and Donald G. Ahearn	303
False-Susceptible Results from the MS-2 System Used for Testing Resistant <i>Pseudomonas aeruginosa</i> Against Two Third-Generation Cephalosporins, Moxalactam and Cefotaxime. Larry L. Stone and Donald L. Jungkind.....	304
